LOCATION

MÁLAGA, A CITY BUILT BY THE LIGHT

- Capital of the Costa del Sol
- Spain's Silicon Valley: Technology Park (Google, Oracle, Bombardier, Siemens, Accenture, etc. with more than 15,000 engineers)
- Cutting edge Infrastructure (Major International Transportation Hub, Hosting the world's largest cruise liners daily, high-speed rail throughout Spain)
- Leading Spanish city in quality of Life and Top 10 in Europe.
- Premier Cultural Destination in Spain (36 Museums: Picasso, Thyssen, Pompidou, etc)
- 4.000.000 visitors per year.
- 300 Sunny Days per year.
- Exceeding 100 M€ in foreign investment last year.
- 1 M+ population in the metropolitan área of Málaga

The resurgence of the real estate sector in Spain has Malaga at the forefront and currently the “go to” city for investors and end users alike. Malaga continues to be the main hotspot in a currently vibrant market nationwide having 32.530 sales in 2018 (7.3% increase from 2017). Malaga is a highly attractive market among leading national and international developers, demonstrated by the many residential projects that are being carried out in the capital.

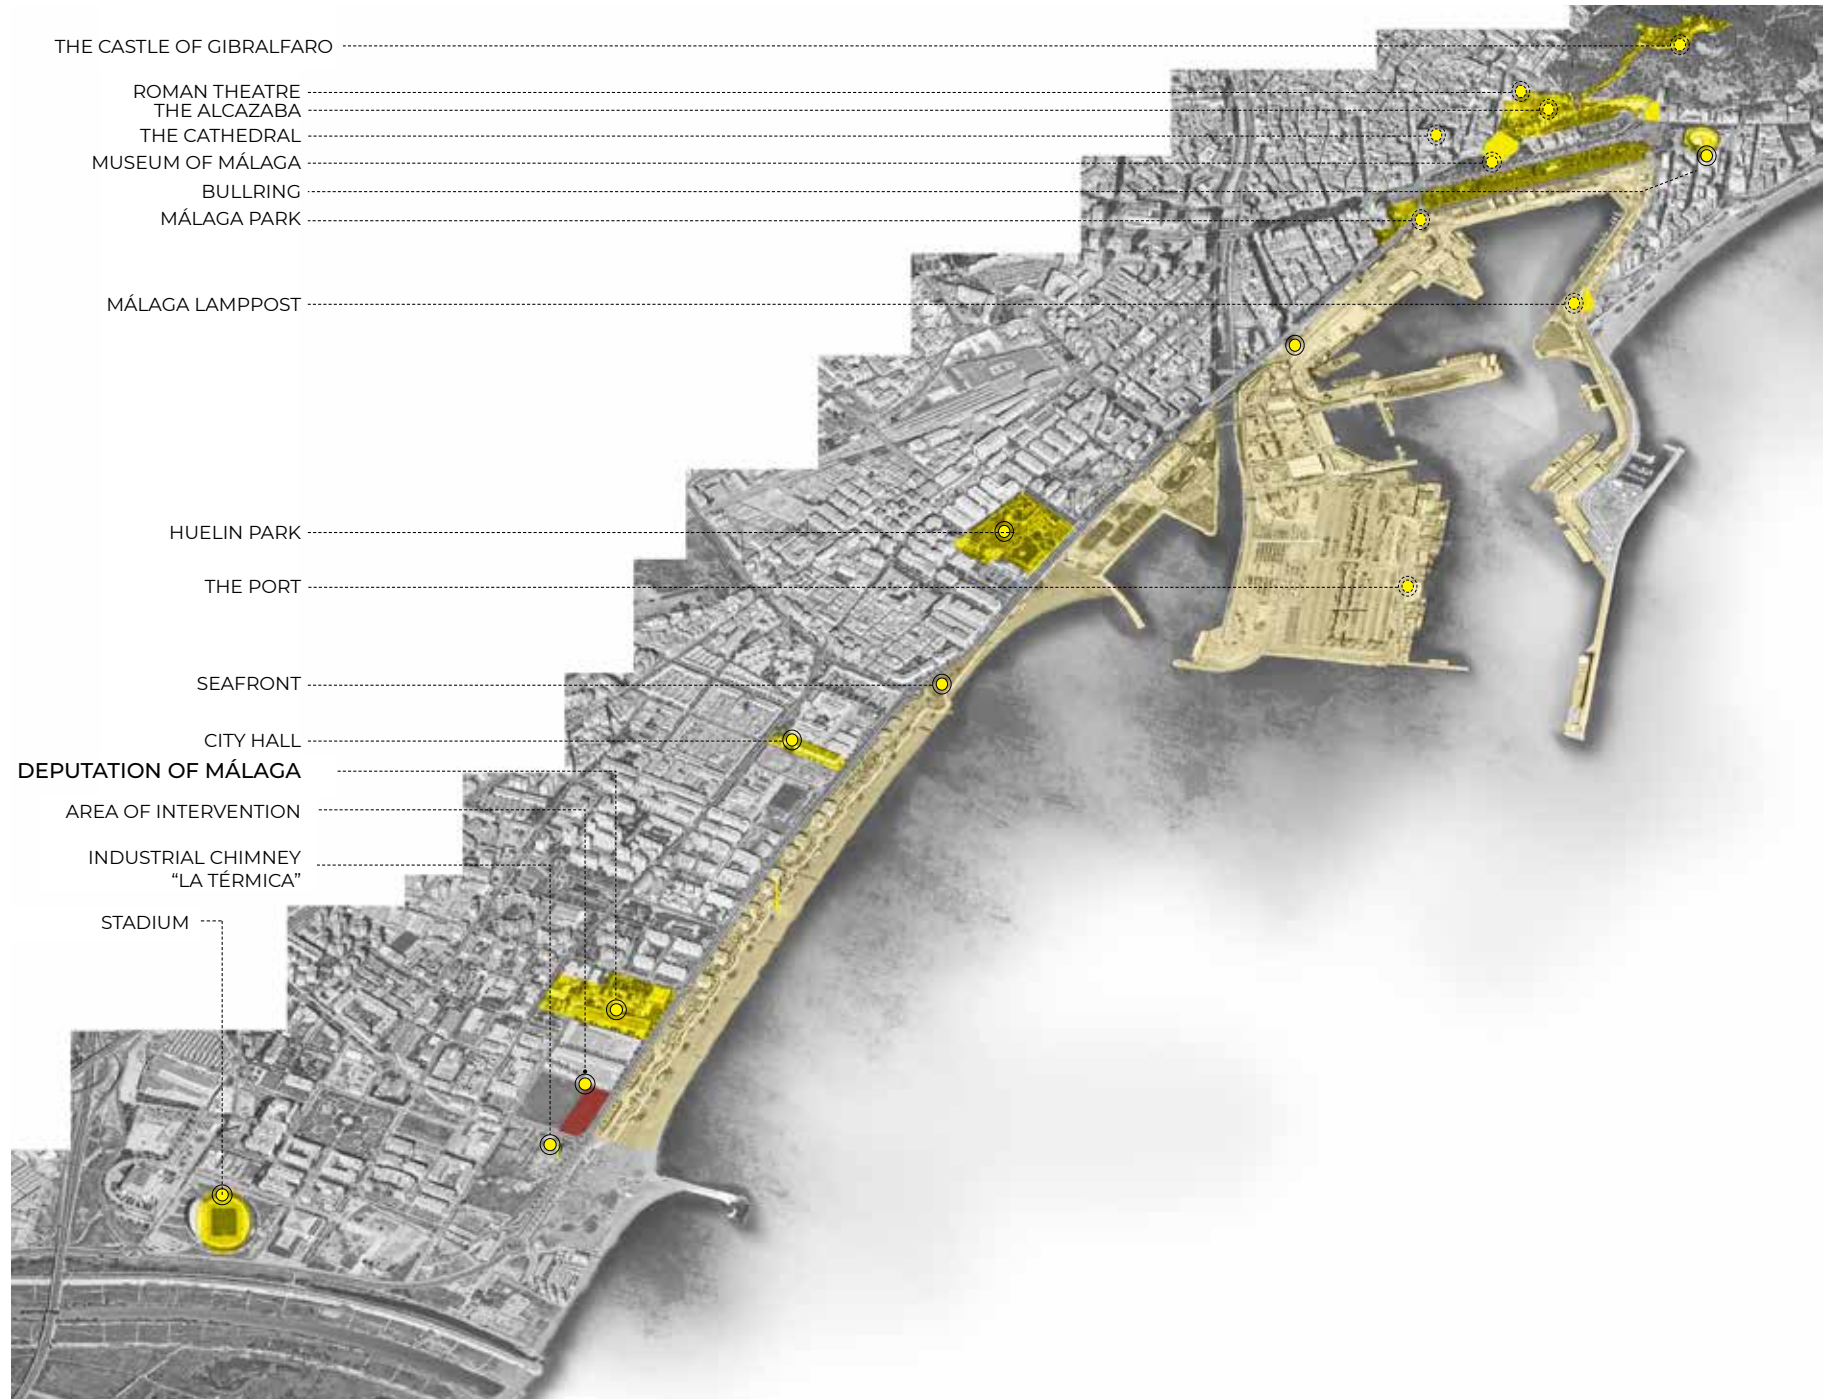

MARKET STATUS

The proposal involves the construction of three towers each built on a space measuring 26x26 metres, which will provide a total of 58,368 square metres of construction. 22 floors with sea views and an interior space of between 45 to 100 square meters which gives the apartments an indescribable feeling of spaciousness. **Homes ranging from 1 to 4 bedrooms, facing the Mediterranean Sea, with the qualities inherent to a luxury villa and the amenities of an apartment.**

MARKETERS

Estudio lamela is one of the most prestigious firms of spanish architecture.

ESTUDIO LAMELA ARQUITECTOS

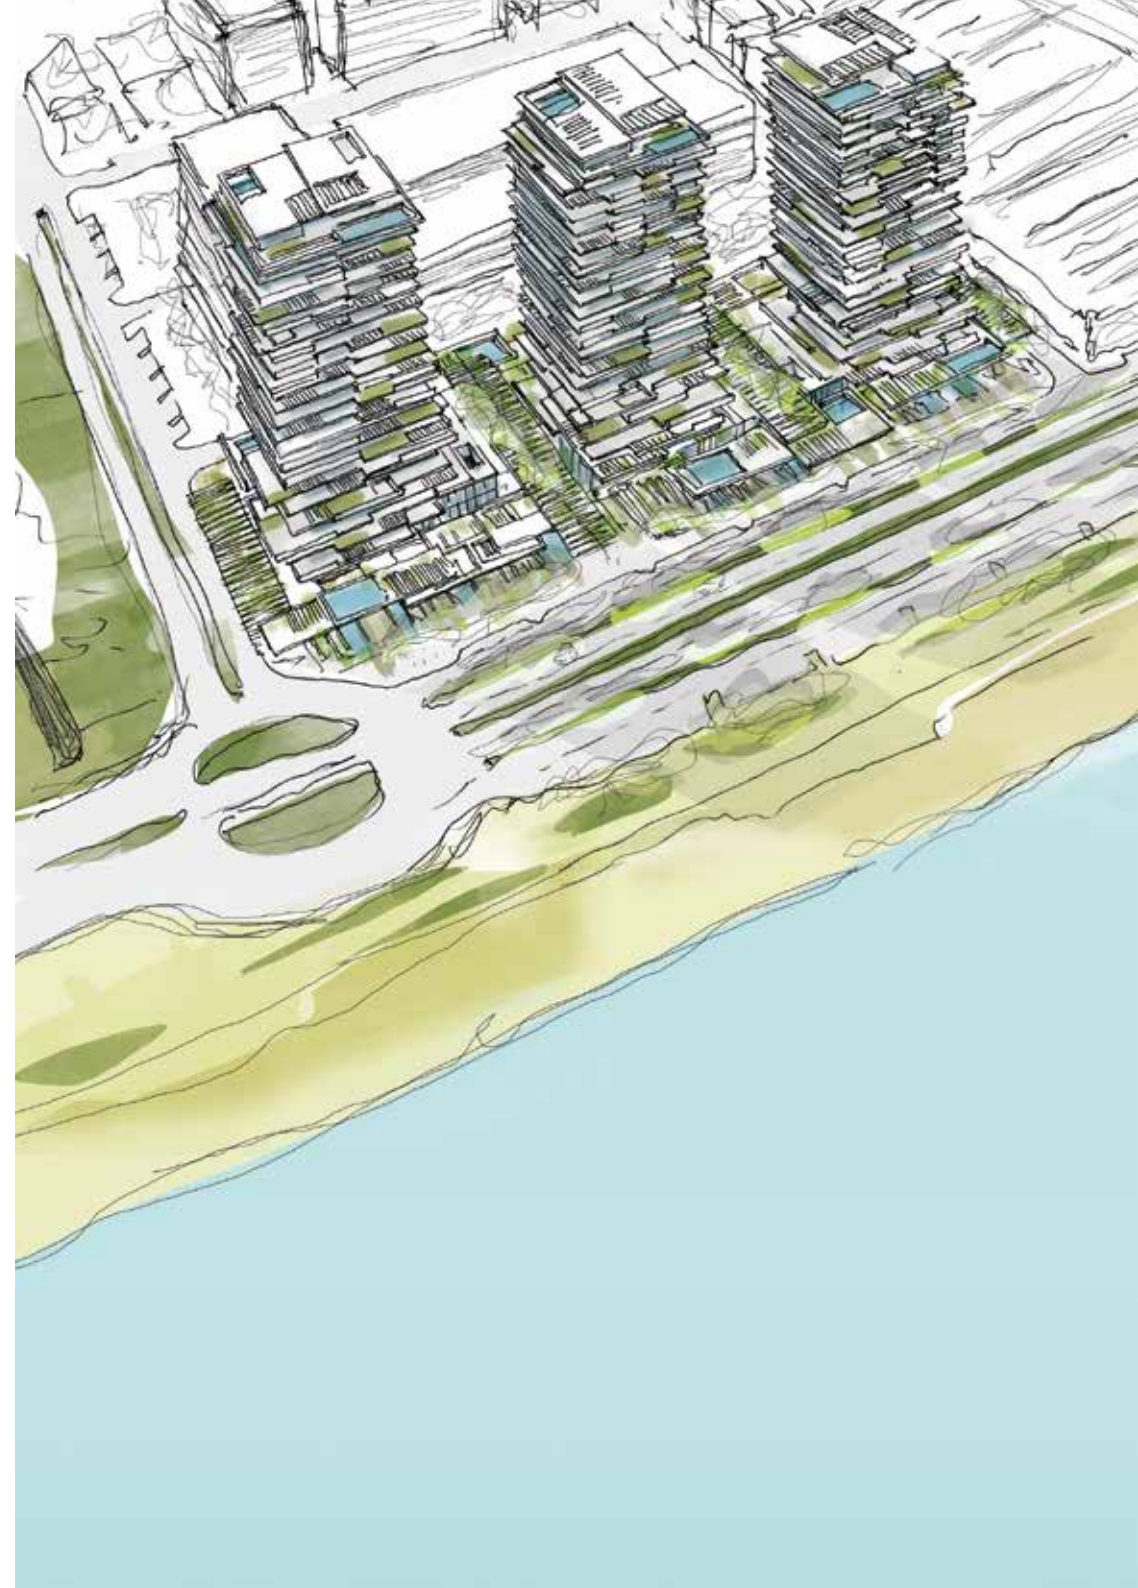

Founded by Antonio Lamela in 1954, the firm has developed approximately 2,000 distinct projects. Carlos Lamela is currently Executive President.

Currently having offices in Madrid, Warsaw, Mexico City and Rotterdam. Estudio Lamela is well versed in all areas of architectural activity: sports, transportation, offices, residential, sanitary and hotel projects, as well as in urban planning.

In Spain, Estudio Lamela has designed remarkable projects such as the transformation from Expo Zaragoza 2008 to Business Park, headquarters of IMDEA Software in Madrid, office buildings such as 'Discovery Building' for Colonial,

Pegaso City, headquarters of John Deere, headquarters from Caja Badajoz, Roca Madrid Gallery in Madrid, the new Residences Real Madrid CF, and the expansion of the Gran Canaria airport.

At the moment, several projects are underway, including the conversion of the Canalejas Complex into a signature Four Seasons hotel, and several prestigious residential buildings in the Madrid neighborhood of Chamberí. The new Airbus offices in Madrid and a large office complex of 110,000 m² in Méndez Álvaro in Madrid are also currently underway.

Jaime Beriostain is responsible for giving shape, style and character to the interior of the towers alongside his studio founded in 2002: Beriostain Studio.

This interior architecture firm based in Barcelona has produced successes all over the world with projects that have made its portfolio a real benchmark in interior design.

The idiosyncrasy of Beriostain combines avant-garde design, a cosmopolitan lifestyle and close attention to details in order to heighten the feeling of wellbeing in the interior of each space. This vision is embodied in the architectural style of the towers, enhancing their modern and ground-breaking character to ensure that this project is recognised for what it is: a work that will make history.

INTERIOR DESIGNERS OF THE PROJECT

The focus of the firm is the developing of architecture and interior design project. Their main goal, is to help their clients to translate their dreams and hopes into reality with quality and excellence in their services as the foundation of their practice. They believe that each project should emerge from the physical and social relationship with its surroundings, and from each client's unique culture and taste.
